LIGHTS OFF!

FOR AT LEAST ONE
DARK NIGHT PER YEAR

www.earth-night.info

earth **NIGHT**
2021-09-07 | 10 pm

September 7th it's time to join: ► Lights off for one night.

Let us all together set a sign against ever increasing masses of artificial light, which humans use to increase the light during nights and to let the planet shine ever more. This so called light pollution kills every year hundreds of billions insects (pollinators), irritates birds and other creatures (also plants), let the night sleep become less relaxing, aids illnesses and let the stars in the sky disappear.

Join us! Turn off the lights. Our planet deserves to experience at least one naturally dark night per year. Also, through this campaign one can achieve a responsible dealing with artificial lights in the future.

Outside lights off

Turn off all outside lights not necessarily needed for security reasons or at least turn them down. Like shop window lights, advertisement lights as well as door, house or other building lights and lights in the garden or open spaces.

Close your blinds

No one has to sit at home in darkness due to the earth night. It also helps if you close your blinds, shades or other window curtains on the windows. This also helps to darken the night considerably.
